Make 3pm safer and happier for everyone!

WE WOULD LIKE TO INTRODUCE YOUR SCHOOL TO :

SIGN SAFE KIDS

the foolproof car line ID system

As we look for ways to improve school safely in this 'contactless' time, we know that working carlines safely eliminate the need for parents and carers to congregate in our school areas, classrooms, and playgrounds.

A proven way to ensure a safe, contactless pickup is using a CarID system. Designed in 2016 by a Sydney Mum and teacher, the simple plastic unit opens on the passenger visor making family names visible 30m from a collection point. Staff can have children assembled in pick-up order, ready to board and continue safely out of the area.

Using a uniform position and "hands off" display has proven to cut carline waiting times in half, noticeably reduce traffic congestion around schools and keeps both hands on the wheel in busy school zones.

Made to last from Kindy to Year 6, they are a one-off school investment **FROM ONLY \$16.95**.

Pymble Public School:

Sign Safe Kids have provided a safe and practical product with CarID's. Students and supervising teachers are able to easily and safely identify parents' cars in our car line. CarID's have provided order and structure to the chaos of busy school zone who require a safe and happy environment.

Loreto Kirribilli:

We have been using the services of Sign Safe Kids for the past three years. We deal with friendly and professional staff. The signs are delivered in time for our first day of school. The size and clarity of the sign makes our Car Line system so much easier. Our parents and staff are very pleased with the quality of the product. I would highly recommend Safe Sign Kids.

The Scots College, Bellevue Hill:

We introduced Sign Safe Visors to our school community 2 years ago to reduce congestion around the Prep school. The results have been outstanding, we are now able to clear carline in half the time. Lizzy and her team are extremely efficient, professional, and courteous. It's a pleasure dealing with Sign Safe Kids.
